#### **DETAILED ACTION**

### Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 49-58 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-48 of U.S. Patent No. 6,649,909. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 49 is the same as claim 1 of the cited patent, but adds the limitation that the lock mass ionization source comprises a photoionization source. Claims 17-20 of the patent recites the use of a laser or UV light source; therefore, these ionization sources are photoionization

source. Therefore claim 49 is anticipated by claims 17-20 and therefore obvious over those claims. Likewise claim 54 is anticipated by claim 48.

### Claim Objections

3. Claims 51-53 and 55-58 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

## Allowable Subject Matter

4. The following is a statement of reasons for the indication of allowable subject matter: the prior art searched and cited failed to teach or fairly suggest a mass calibration apparatus for a mass analyzer wherein the lock mass source comprises a gas source and the ion optic has a central axis; wherein the ion optic include two vacuum stages with the lock mass source being situated in the second stage; or wherein the lock mass source is situated externally and adjacent the second stage. Such limitations would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents; 3,920,986 (Fies, Jr.), 6,504,150 (Verentchikov et al), and 6,331,702 (Krutchinsky et al). All of the cited US patents contain art similar to that being claimed by applicant, more specifically, methods and apparatuses for mass spectrometry.
